

INDEX FOR VOLUME 41

- Andersen, Erling B. Paired comparisons with individual differences. 141–157.
- Archer, Claude O. and Jennrich, Robert I. A look, by simulation, at the validity of some asymptotic distribution results for rotated loadings. 537–541.
- Berry, Kenneth J. (see Mielke, Paul W., Jr.)
- Carlson, James E. (see Timm, Neil H.)
- Carroll, J. Douglas. Spatial, non-spatial and hybrid models for scaling. 439–463.
- Cliff, Norman and Krus, David J. Interpretation of canonical analysis: Rotated vs. unrotated solutions. 35–42.
- Cliff, Norman (see Girard, Roger A.)
- Davison, Mark L. Fitting and testing Carroll's weighted unfolding model for preferences. 233–247.
- Dayton, C. Mitchell and MacReady, George B. A probabilistic model for validation of behavioral hierarchies. 189–204.
- de Leeuw, Jan (see Young, Forrest W., de Leeuw, Jan and Takane, Yoshio)
- de Leeuw, Jan, Young, Forrest W. and Takane, Yoshio. Additive structure in qualitative data: The alternating least squares method with optimal scaling features. 471–503.
- Flanagan, John C. Frederick Barton Davis. 5–7.
- Girard, Roger A. and Cliff, Norman. A Monte Carlo evaluation of interactive multidimensional scaling. 43–64.
- Hakstian, A. Ralph and Whalen, Thomas E. A  $k$ -sample significance test for independent alpha coefficients. 219–231.
- Half, Henry M. Precriterion stationarity in Markovian learning models. 301–320.
- Humphreys, Lloyd (see Montanelli, Richard G.)
- Huynh, Huynh. Statistical consideration of mastery scores. 65–78.
- Jennrich, Robert I. (see Archer, Claude O.)
- Joe, George W. and Woodward, J. Arthur. Some developments in multivariate generalizability. 205–217.
- Kaiser, Henry F. Image and anti-image covariance matrices from a correlation matrix that may be singular. 295–300.
- Khatri, C. G. A note on multiple and canonical correlations for a singular covariance matrix. 465–470.
- Korth, Bruce and Tucker, Ledyard R. Procrustes matching by congruence coefficients. 531–535.
- Krus, David J. (see Cliff, Norman)
- Kruskal, Joseph B. More factors than subjects, tests, and treatments: An indeterminacy theorem for canonical decomposition and individual differences scaling. 281–293.
- Lord, Frederic M. and Stocking, Martha L. An interval estimate for making statistical inferences about true scores. 79–87.
- MacCallum, Robert C. Effects on INDSCAL of non-orthogonal perceptions of object space dimensions. 177–188.
- MacCallum, Robert C. Transformation of a three-mode multidimensional scaling solution to INDSCAL form. 385–400.
- MacReady, George B. (see Dayton, C. Mitchell)
- Mielke, Paul W., Jr. and Berry, Kenneth J. An extended class of matched pairs tests based on power of ranks. 89–100.

- Montanelli, Richard G. and Humphreys, Lloyd. Latent roots of random data correlation matrices with squared multiple correlations on the diagonal: A Monte Carlo study. 341-348.
- Mulaik, Stanley A. Comments on "The measurement of factorial indeterminacy". 249-262.
- ✓ Rabinowitz, George. A measure of interobject similarity consistent with the multidimensional unfolding model. 349-373.
- Rogers, W. Todd. Jackknifing disattenuated correlations. 121-133.
- Schulman, Robert S. Correlation and prediction in ordinal test theory. 329-340.
- Stewart, Thomas R. Components of correlation and extensions of the lens model equation. 101-120.
- Stocking, Martha L. (see Lord, Frederic M.)
- Takane, Yoshio (see de Leeuw, Jan, Young, Forrest W. and Takane, Yoshio; see also Young, Forrest W., de Leeuw, Jan and Takane, Yoshio)
- Thissen, David (see Wainer, Howard)
- Thurstone, Thelma G. Dorothy C. Adkins. 434-437.
- Timm, Neil H. and Carlson, James E. Part and bipartial canonical correlation analysis. 159-176.
- Tucker, Ledyard R (see Korth, Bruce)
- Velicer, Wayne F. Determining the number of components from the matrix of partial correlations. 321-327.
- Wainer, Howard and Thissen, David. Three steps toward robust regression. 9-34.
- Wellington, Roger. Extending generalized symmetric means to arbitrary matrix sampling designs. 375-384.
- Whalen, Thomas E. (see Hakstian, A. Ralph)
- Woodward, J. Arthur (see Joe, George W.)
- Young, Forrest W. (see de Leeuw, Jan, Young, Forrest W. and Takane, Yoshio)
- Young, Forrest W., de Leeuw, Jan and Takane, Yoshio. Regression with qualitative and quantitative variables: An alternating least squares method with optimal scaling features. 505-529.

#### *Notes and Comments*

- Allison, Paul A. A simple proof of the Spearman-Brown formula for continuous test lengths. 135-136.
- Clark, Andrew K. Reevaluation of Monte Carlo studies on nonmetric multidimensional scaling. 401-403.
- Davison, Mark L. External analyses of preference models. 557-558.
- Frane, James W. Some simple procedures for handling missing data for ordered variables in multivariate analysis. 409-415.
- Freeman, Linton. A further note on Freeman's measure of association. 273-275.
- Green, Bert F., Jr. On the factor score controversy. 263-266.
- Hakstian, A. Ralph. Two-matrix orthogonal rotation procedures. 267-272.
- Koopman, Raymond F. Fast regression estimates of missing data. 277.
- Lissitz, Robert W. and Schönemann, Peter H. A solution to the weighted procrustes problem in which the transformation is in agreement with the loss function. 547-550.
- Martin, Charles G. Comments on Levy's "An empirical comparison of the z-variance and Box-Scheffé tests for homogeneity of variance". 551-556.
- McDonald, Roderick P. A note on monotone polygons fitted to bivariate data. 543-546.
- Schönemann, Peter H. (see Lissitz, Robert W.)
- White, P. Owen. A note on Keats' generalization of the Rasch model. 405-407.
