

INDEX FOR VOLUME 43

- Abrahams, Norman M. & Alf, Edward F., Jr. Relative costs and statistical power in the extreme groups approach. 11-17.
- Alf, Edward F., Jr. (see Abrahams, Norman M.)
- Andrich, David. A rating formulation for ordered response categories. 561-573.
- Baker, Frank B. (see Hubert, Lawrence J.)
- Baker, Frank B. (see Hubert, Lawrence J.)
- Bentler, Peter M. & Lee, Sik-Yum. Statistical aspects of a three-mode factor analysis model. 343-352.
- Bloxom, Bruce. Constrained multidimensional scaling in N space. 397-408.
- Borg, Ingwer (see Lingoës, James C.)
- D'Andrade, Roy G. U-Statistic hierarchical clustering. 59-67.
- de Leeuw, Jan. A new computational method to fit the weighted euclidean distance model. 479-490.
- Drösler, Jan. Extending the temporal range of psychometric prediction by optimal linear filtering of mental test scores. 533-549.
- Duncan, George T. Binary action based estimations of propensities. 93-107.
- Duncan, George T. (see Milton, E. O.)
- Fleishman, Allen I. A method for simulating non-normal distributions. 521-532.
- Fleiss, Joseph L. & Shrouf, Patrick E. Approximate interval estimation for a certain intraclass correlation coefficient. 259-261.
- Hettmansperger, Thomas P. & McKean, Joseph W. Statistical inference based on ranks. 69-79.
- Hubert, Lawrence J. & Baker, Frank B. Applications of combinatorial programming to data analysis: The traveling salesman and related problems. 81-91.
- Hubert, Lawrence J. & Baker, Frank B. Evaluating the conformity of sociometric measurements. 31-41.
- Huynh, Huynh. Reliability of multiple classifications. 317-325.
- Huynh, Huynh. Some approximate tests for repeated measurement designs. 161-175.
- Jennrich, Robert I. Rotational equivalence of factor loading matrices with specified values. 421-426.
- Jöreskog, Karl G. Structural analysis of covariance and correlation matrices. 443-477.
- Larntz, Kinley & Regal, Ronald R. Likelihood methods for testing group problem solving models with censored data. 353-366.
- Lee, Sik-Yum (see Bentler, Peter M.)
- Levine, David. A Monte Carlo study of Kruskal's variance based measure of stress. 307-315.
- Lingoës, James C. & Borg, Ingwer. A direct approach to individual differences scaling using increasingly complex transformations. 491-519.
- McClave, J. T. (see Wackerly, D. D.)
- McDonald, Roderick P. (see Muliak, Stanley A.)
- McKean, Joseph W. (see Hettmansperger, Thomas P.)
- Milton, E. O. & Duncan, George T. Multiple-answer multiple choice test items: Responding and scoring through Bayes and minimax strategies. 43-57.
- Muliak, Stanley A. & McDonald, Roderick P. The effect of additional variables on factor indeterminacy in models with a single common factor. 177-192.
- Muthén, Bengt. Contributions to factor analysis of dichotomous variables. 551-560.
- Nishisato, Shizuhiko. Optimal scaling of paired comparison and rank order data: An alternative to Guttman's formulation. 263-271.
- Null, Cynthia H. (see Young, Forrest W.)
- O'Brien, Ralph G. Robust techniques for testing heterogeneity of variance effects in factorial designs. 327-342.
- Pruzansky, Sandra (see de Leeuw, Jan)
- Ramsay, James O. Confidence regions for multidimensional scaling analysis. 145-160.
- Rao, P. V. (see Wackerly, D. D.)
- Read, Campbell R. Tests of symmetry in three-way contingency tables. 409-420.
- Regal, Ronald R. (see Larntz, Kinley)
- Rubin, Donald B. & Thayer, Dorothy. Relating tests given to different samples. 3-10.

- Saito, Takayuki. An alternative procedure to the additive constant problem in metric multi-dimensional scaling. 193-201.
- Schacht, Stephen (see Wainer, Howard)
- Schulman, Robert S. Individual distributions under ordinal measurement. 19-29.
- Shrout, Patrick E. (see Fleiss, Joseph L.)
- Sörbom, Dag. An alternative to the methodology for analysis of covariance. 381-396.
- ten Berge, Jos M. F. & Zegers, Frits. A series of lower bounds to the reliability of a test. 575-579.
- Thayer, Dorothy. (see Rubin, Donald B.)
- van Driel, Otto P. On various causes of improper solutions in maximum likelihood factor analysis. 225-243.
- Wackerley, D. D., McClave, J. T. & Rao, P. V. Measuring nominal scale agreement between a judge and a known standard. 213-223.
- Wainer, Howard & Schacht, Stephen. Gapping. 203-212.
- Wilcox, Rand R. Estimating true score in the compound binomial error model. 245-258.
- Williams, James S. A definition for the common-factor analysis model and the elimination of problems of factor score indeterminacy. 293-306.
- Young, Forrest W. & Null, Cynthia H. Multidimensional scaling of nominal data: The recovery of metric information with ALSCAL. 367-379.
- Zegers, Frits (see ten Berge, Jos M. F.)

Notes and Comments
