

INDEX FOR VOLUME 51

*Articles*

- Appelbaum, Mark. Statistics, data analysis, and Psychometrika: Major developments. 53–56.
- Bentler, P. M. Structural modeling and Psychometrika: An historical perspective of growth and achievements. 35–51.
- Besse, Philippe & Ramsay, James O. Principal components analysis of sampled functions. 285–311.
- Bieber, Stephen L. & Meredith, William. Transformation to achieve a longitudinally stationary factor pattern matrix. 535–547.
- Bhoj, Dinesh S. & Snijders, Tom A. B. Testing equality of correlated proportions with incomplete data on both responses. 579–588.
- Bollen, Kenneth A. Sample Size and Bentler and Bonett's nonnormed fit index. 375–377.
- Bowden, Roger J. Self-selection biases in correlational studies based on questionnaires. 313–325.
- Browne, Michael W. (see Greenacre, Michael J.)
- Buchana, Bruce. A model for repeat trial product tests.
- Clogg, Clifford C. & Goodman, Leo A. On scaling models applied to data from several groups. 123–135.
- Cohen, Ayala. Comparing variances of correlated variables. 379–391.
- Cook, Wade D., Kress, Moshe, & Seiford, Lawrence M. Information and preference in partial orders: A bi-matrix representation. 197–207.
- Corter, James E. & Tversky, Amos. Extended similarity trees. 429–451.
- Feld, Leonard S. (see Woodruff, David J.)
- Gifford, Janice A. (see Swaminathan, Hariharan)
- Goodman, Leo A. (see Clogg, Clifford C.)
- Green, Bert F. Models, computers and policies: Fifty years of Psychometrika. 65–68.
- Greenacre, Michael J. & Browne, Michael W. An efficient alternating least-squares algorithm to perform multi-dimensional unfolding. 241–250.
- Guay, Roland B. & McCabe, George P. A binomial test for hierarchical dependency. 467–474.
- Horst, Paul & Stalnakar, John. Present at the birth. 3–6.
- Ihara, Masamori & Kano, Yutaka. A new estimation of the uniqueness in factor analysis. 563–566.
- Jannarone, Robert J. Conjunctive item response theory kernels. 357–373.
- Jansen, P. G. W. & Roskam, Edward E. Latent trait models and dichotomization of graded responses. 69–91.
- Jarjoura, Dave. Probability-Of-Coverage tolerance intervals. 137–141.
- Jennrich, Robert I. A Gauss-Newton algorithm for exploratory factor analysis. 277–284.
- Kano, Yutaka (see Ihara, Masamori)
- Kapteyn, Arie, Neudecker, Heinz, & Wansbeek, Tom. An approach to  $n$ -mode components analysis. 269–275.
- Kress, Moshe (see Cook, Wade D.)
- Lee, Sik-Yum. Estimation for structural equation models data. 93–99.
- Lee, Sik-Yum & Poon, Wai-Yin. Maximum likelihood estimation of polyserial correlations. 113–121.
- Lewis, Charles. Test theory and Psychometrika: The past twenty-five years. 11–22.
- Lin, Hsin Ying (see Tsutakawa, Robert K.)
- McCabe, George P. (see Guay, Roland B.)
- McDonald, Roderick P. Describing the elephant: Structure and function in Multivariate data. 513–534.
- William, Meredith (see Bieber, Stephen L.)
- Mislevy, Robert J. Bayes modal estimation in item response models. 177–195.
- Mulaik, Stanley A. Factor analysis and Psychometrika: Major developments. 23–33.
- Neudecker, Heinz (see Kapteyn, Arie)
- Otter, Pieter W. Dynamic structural systems under indirect observation: Identifiability and estimation aspects from a system theoretic perspective. 415–428.
- Poon, Wai-Yin (see Lee, Sik-Yum)
- Ramsay, James O. (see Besse, Philippe)
- Reynolds, Thomas J. & Sutrick, Kenneth H. Assessing the correspondence of one or more vectors to a symmetric matrix using ordinal regression. 101–112.
- Roskam, Edward E. (see Jansen, P. G. W.)
- Schouten, Hubert J. A. Nominal scale agreement among observers. 453–466.
- Seiford, Lawrence M. (see Cook, Wade D.)
- Skinner, C. J. Regression estimation and post-stratification in factor analysis. 347–356.
- Snijders, Tom A. B. (see Bhoj, Dinesh S.)
- Stalnakar, John (see Horst, Paul)
- Steinberg, Lynne (see Thissen, David)

- Stucliffe, J. P. Differential ordering of objects and attributes. 209–240.
- Sutrick, Kenneth H. (see Reynolds, Thomas J.)
- Swaminathan, Hariharan & Gifford, Janice A. Bayesian estimation in the three-parameter logistic model. 589–601.
- ten Berge, Jos M. F. (see Zegers, Frits E.)
- Thissen, David & Steinberg, Lynne. A taxonomy of item response models. 567–577.
- Thurstone, L. L. Psychology as a quantitative rational science (excerpts) 7–10.
- Torgerson, Warren S. Scaling and Psychometrika: Spatial and alternative representations of similarity data. 57–63.
- Tsutakawa, Robert K. & Lin, Hsin Ying. Bayesian estimation of item response curves. 251–267.
- Tversky, Amos (see Corter, James E.)
- Wansbeck, Tom (see Kapteyn, Arie)
- Woodruff, David J. & Feld, Leonard S. Tests for equality of several alpha coefficients when their sample estimates are dependent. 393–413.
- Zegers, Frits E. A family of chance-corrected association coefficients for metric scales. 559–562.
- Zegers, Frits E. & ten Berge, Jos M. F. Correlation coefficients for more than one scale type: An alternative to the Janson and Vegelius approach. 549–557.

#### *Computational Psychometrics*

- Kuhfeld, Warren F. Metric and nonmetric plotting of models. 155–161.
- Kuhfeld, Warren F. A note on Roy's largest root. 479–481.
- Nyren, Thomas E. A two-stage algorithm for assessing violations of additivity via axiomatic and numerical conjoint analysis. 483–491.
- Ramsay, James O. A PROC MATRIX program for preference-dissimilarity multidimensional scaling. 163–170.
- ten Berge, Jos M. F. (see Zegers, Frits E.)

#### *Notes and Comments*

- Bekker, Paul A. A note on the identification of restricted factor loading matrices. 607–611.
- Bettonvil, Bert (see de Leeuw, Jan)
- Cudeck, Robert. A note on structural models for circumplex. 143–147.
- de Leeuw, Jan & Bettonvil, Bert. An upper bound for stress. 149–153.
- Formann, Anton K. A note on the computation of the second-order derivatives of the elementary symmetric functions in the Rasch model. 335–339.
- Forsythe, Mark D. (see Schluchter, Mark D.)
- Huynh, Huynh. On the reliability of the extreme score. 475–478.
- McGuire, Dennis P. The occurrence of an increase in correlation with explicit selection. 331–333.
- Nevels, Klaas. A direct solution for pairwise rotations in Kaiser's varimax method. 327–329.
- Schluchter, Mark D. & Forsythe, Alan B. A caveat on the use of a revised bootstrap algorithm. 603–605.

#### *Reviews*

- Israels, Abby. Review of *Canonical Analysis. A Review With Applications in Ecology* by R. Gittins. 495–497.
- Labouvie, Erich. Review of *Cohort Analysis in Social Research. Beyond the Identification Problem* by W. W. M. Mason and S. E. Fienberg (Eds.). 498–499.
- Mooijaart, Ab. Review of *Factor Analysis and Related Methods* by Roderick P. McDonald. 501–502.
- Wainer, Howard & Wainer, Laurent. Review of *The Statistical Exorcist* by Myles Hollander and Frank Proschan. 341–343.
