

Psychometrician
American Dental Association
Chicago, IL

A focused mind coupled with strong teamwork can reap amazing results. Just ask anyone at the American Dental Association. The commitment of our people has made us one of only nine organizations to earn a rating of "Remarkable" in the American Society of Association Executive's (ASAE)/Center for Association Leadership study, "Measures of Success." It's a rating we're very proud of, and one we know will only improve with you on our team. Because it's efforts like yours that make us great.

This position's main responsibilities include, but are not limited to, conducting item and test analyses, calibrations, equating, standard-setting, other psychometric-related activities as assigned, and scoring some of the tests/examinations; conducting validity and other quality control research as well as assisting with client-initiated research projects.

This position requires a Ph.D. in educational psychology, quantitative analysis, psychometrics, educational measurement, or psychology and a minimum of two years experience working in a research or testing agency; knowledge of Item Response Theory, psychometric models, measurement theories, scaling and equating procedures, parametric and non-parametric statistical techniques, including multivariate, correlation and regression analysis; proficiency with SAS and previous experience using calibration programs, preferably Winsteps; excellent oral and written communication skills.

We offer an excellent location, competitive salary and benefit plan. Please send resume and salary requirements to: The American Dental Association, 211 East Chicago Avenue, Dept PR#6127, Chicago, IL 60611. E-mail: jobs@ada.org. www.ada.org/goto/jobs. EOE
