

JOB POSTING

Computer Adaptive Testing (CAT) Expert

Location	Provo, Utah
Position	Full Time
Department	Instructional Design

Position Purpose

Imagine Learning is seeking an experienced psychometrician with the ability to design and supervise the development of high-quality assessments. This position will design assessment products utilizing computer adaptive testing applications and input from curriculum designers, guide the development and testing of new assessment products, and present information to educators and sales representatives on the tests' technical qualities. Occasional travel may be required.

Qualifications

- Advanced degree in Educational/Psychological Measurement, Statistics, or a related field required
- Minimum of one year of experience applying principles of measurement to practical testing problems
- Experience in applying item response theory and other relevant psychometric models to evaluate test performance
- Experience in analyzing tests' technical qualities (reliability, validity, etc.)
- Experience directing teams of item writers
- Working knowledge of statistical software
- Experience in designing computer-adaptive assessments
- Excellent computer skills
- Strong attention to detail
- Excellent presentation and communication skills
- Proactive, independent worker
- Foreign language ability preferred

Application Procedure

Please send cover letter and resume to careers@imaginelearning.com. Include the title "CAT Expert" in the subject line.
